Tribune quietly says:

If the Mormons mean to browheat a free press, it is a disgraceful acknowledgement that both the Herald and Ness cannot compete with it, despite a majority on their side of five to one. If the other thing is meant, it will be equally futile, because there are men who, while making no pretensions to extraordinary herve, cannot be driven from the straight line of duty except by killing them, and should that be accomplished the free press would still remain, and the mantle of the dead, falling upon others who would spring to fill their places, would give a deeper emphasis to the voices which they would give to the press in hastening free government for Utah, for the march of etternal justice cannot be stayed, either by bluffs or buildozing.

The Missouri Court lays down the conditions which must occur to protect the title of a purchaser upon a sale made by a vendor with a fraudulent intent. He must buy without notice of the bad intent on the part of the vendor; he must be a purchase for a valuable consideration and he must have paid the money before he had notice of the fraud.

Texas is in ta desperate Asituatio There are two and one-half millions more in the treasury than is needed to pay the Commonwealth expenses, and the financiers are unable to contrive ways and means for disposing of so much money. The Constitution does not allow renkless investments, and before an amendment can be adopted the sum will be doubled. Poor Texas! Some assisted amigration from the financial politicians of other States will doubtless be needed.

At Stockton, California, there is a converted Chinaman engaged in the work of preaching the Christian religion to ungenerated pagans in the Mongolian quarters of that city. He does not appear to be making much headway, however, for it is said his countrymen treat him with utter contempt: This exhorter is an ex-miner, who now receives \$30 a month for his services in the proselyting field. His countryme look on his conversion and his preach ing as part of a mercenary plan to earn money without any sweat: of the brow ind we fancy that they are not far out of the way.

The Democracy in Ohio are not etting along as harmoniously as was predicted in the outset of the campaign. There is a disagreement in their ranks which promises to prove fatal to the success of the party next October. The quarrel ostensibly is over the United States Senatorship. The term of Senator Pendleton expires with the present Congress, and the duty of electing his nocessor devolves upon the Legislature to be elected in October, Senator Penlleton desires to succeed himself, and the other faction of the party has another candidate in view. The objection to Senator Pendleton is that he favored the civil service reform bill, a device which, the other faction declares, will keep in Republicans now in office, the rest of their natural lives. If is urged, also, against Pendleton that he is an aristocrat by instinct and association, and is more in sympathy with the financial policy of the Republican party than with that of the party he looks to for About a year ago there appeared

an exhaustive article in the California Medical Journal on the subject of insanity, in which appeared the following: "It is calculated by an eminent writer on insanity and its causes, that, at the present rate of fectly same man will be adjudged insane by his fellows and confined in an insane asylum." The writer of the article was Dr. Shurtleff, Medical Superintendent of the California Insane Asylum, who has himself recently shown such evidence of insanity as to necessitate his confine ment. The report of the Doctor's insanity has been contradicted, but it is believed, nevertheless, that he evinced symptoms of being deranged. It is thought that his constant study and reflection upon the one subject of insane diseases brought upon him a morbid condition of mind very similar to, if not identical with in-
